#### Open Source Business Intelligence Tools Production Deployments will grow five-fold through 2012

Gartner's report entitled "Open Source Business Intelligence Tools Production Deployments will grow five-fold through 2012" focuses on the increasing success of Open Source Business Intelligence solutions in the different market sectors, underlining the advantages that they offer to the users. In this report, Gartner confirms that it is tracking SpagoBI as "one of the five organizations (in OS BI) that have made a name for themselves".

The article is available [here](#).

#### New article on interoperability: "Fare squadra davvero"

Engineering participates in a panel (in Italian), opened to the main actors of the interoperability in the public administration. Antonio Majori, Technical Manager of Engineering Group and founder of Spagic project, describes Engineering's approach and presents the Universal Middleware, realized through Spagic, as an innovative approach to the governance and realization of highly modular and configurable SOA solutions.
