

SpagoWorld Newsletter N°15 - February 2010

Dear Subscriber,

Here is SpagoWorld newsletter of February, full of new interesting highlights, such as Spago4Q and Ingres-SpagoBI Bundle new releases, Engineering's new membership in Eclipse Foundation and in the OSGi Alliance, a success story about SpagoBI for FIAT Group Automobiles and a new video interview on Spago4Q!

Best regards,

SpagoWorld Communications

News

Spago4Q 2.3 out now!

Spago4Q 2.3 is out now! You can download it [here!](#)

This new release offers several innovations, such as the opportunity to check the extracted data before loading them into the data warehouse, some improved features for the usage and administration of the platform, the simplified management of dependencies for the development of code and some bug fixing.

Ingres-SpagoBI Bundle 2.0 released

SpagoBI/Ingres Analytical Platform 2.0 has been released! You can download it [here!](#)

The second version of this entirely open source bundle enterprise solution for Business Intelligence projects, risen from the cooperation between Engineering and Ingres Corporation, improves the Business Intelligence environment, which is based on the SpagoBI Server module of SpagoBI 2.4. In particular, it offers some new analysis tools and a new type of users' interface. Moreover, it enhances the integration and installation process of the metadata repository of the BI Server into Ingres database.

Engineering joins the Eclipse Foundation

Engineering has joined the [Eclipse Foundation](#) as a Solutions Member.

The first steps of this membership are:

- its participation in the [Eclipse SOA Initiative](#)
- its proposal of two new projects, as the project leader: [eBAM](#) and [eBPM](#)

For further information, click [here](#).

The [Press Release](#) is available [here](#).

Engineering joins the OSGi Alliance

Engineering Ingegneria Informatica is an OSGi Alliance Supporter. Engineering promotes the OSGi technology through Spagic project, which realizes an open source platform supporting the governance of middleware services and the development of SOA/BPM applications through highly modular and configurable Universal Middleware.

The [OSGi Alliance](#) (Open Service Gateway initiative) is a non-profit worldwide consortium of technology innovators that advances a proven and mature process to assure interoperability of applications and services, based on its component integration platform.

Events

Solutions Linux 2010

Location: Paris, France

Date: 16th - 18th March 2010

Engineering participates in the 11th edition of [Solutions Linux](#), in the different sessions and initiatives of the event:

- the free/open source solutions SpagoBI, Spagic and Spago4Q are presented at Engineering's booth (OW2 Village).
- 16th March - Stefano Scamuzzo, Engineering's Senior Technical Manager, participates in the Plateau TV with a speech in French about the Business Intelligence between open source and proprietary solutions.
- OW2 Day (18th March) - Some members of SpagoWorld projects core development team deliver some speeches about Business Intelligence, Location Intelligence and OSGi Universal Middleware. The programme also includes two individual interviews, respectively about the Business Intelligence in the Open Source domain and the Universal Middleware as a new opportunity towards interoperability.

For further information and the complete programme, click [here](#).

EclipseCon 2010

Location: Santa Clara, California, USA

Date: 22nd - 25th March 2010

Andrea Zoppello, Spagic Architect, and Antonio Majori, founder of Spagic project, participate in the [EclipseCon 2010](#). In particular, Andrea gives a speech entitled "Integration of BPEL with OSGi for an effective SOA solution". The speech is centred around the integration of the Open Source BPEL engine Apache ODE with OSGi services, within the embedded container Equinox. Moreover, the presentation refers to the core of Spagic platform, with a particular focus on the new orchestration features for OSGi services and connectors and on the support offered to the governance of SOA projects through the web console Spagic Monitor.
