

SpagoWorld Newsletter N°18 - May 2010

Dear Subscriber,

Have a look at SpagoWorld newsletter of May, including lots of interesting news and events, such as Spagic 3.0.0 release, the new eBAM and eBPM projects, the Red Hat Open Source Day and Eclipse SOA/Interoperability Day 2010 in Italy!

Best regards,
SpagoWorld Communications

News

Engineering Group announces two new Eclipse projects

Engineering Group is leader of two new Eclipse open source projects, through which the company contributes to the realization of the new Eclipse Open Source SOA platform.

- The **eBAM** (extended Business Activity Monitoring) project aims to realize an advanced platform for the monitoring of heterogeneous services and applications (infrastructures, processes, components) and the historical analysis of data. [Further information](#)
- The **eBPM** (eclipse Business Process Management) project aims to realize a complete BPM solution for OSGi. The eBPM project provides UI and runtime support, to allow to deploy and manage the OSGi services in a declarative way as well as to leverage the capabilities of the OSGi declarative services.
