

SpagoWorld Newsletter N°20 - July 2010

Dear Subscriber,

Have a look at SpagoWorld newsletter of July, including a lot of interesting news and events, such as SpagoBI 2.6 and Spago4Q 2.3.1 releases, the new SpagoBI Forum, the Eclipse Day in Rome and Engineering Group's participation in OW2 Open Source Cloudware Initiative.

See you in September, after a short summer break!

Best regards,
SpagoWorld Communications

News

SpagoBI 2.6 available now

SpagoBI 2.6 has been released. It is available now for free download [here](#).
The most important innovations of this new release concern:

- the new external engines *SpagoBIConsoleEngine* and *SpagoBICommonJEngine*;
- *SpagoBIJPalloEngine*, allowing users to manage OLAP documents;
- *SpagoBIQbeEngine*, offering new Qbe external services and a new in-line calculated field.

Further details are available [here](#).

The **Demo** is available [here](#).

Spago4Q 2.3.1 available now

Spago4Q has been released. Download it [here](#) now!
This release supports SpagoBI 2.5 version, provides some new bug fixes and offers some new features supporting Oracle database, downloadable from the [project repository](#).

New SpagoBI Forum

SpagoBI team announces the new project Forum, which is available [here](#).
SpagoBI Forum allows you to share all technical issues concerning SpagoBI Suite components and features with the whole community. It has been conceived so as to support you in the adoption and use of this solution, to allow you to discuss about Open Source Business Intelligence, to participate in the enhancement of the platform and to share your experience with other software developers.
