SpagoWorld Newsletter N°29 - June 2011

Dear Subscriber,
The new SpagoBI 3.0 version, which was released on 15th June 2011, marks a turning point in the Open Source Business Intelligence domain, thanks to the support of the ever-growing free/open source SpagoWorld initiative and the contributions of its vibrant open community. Now, the only 100% open source BI suite stands out among the other free and proprietary products available on the market, since it allows to develop efficient solutions that meet the users' requirements, by using a free, flexible, agile and user-friendly solution, provided with a wide range of renovated support services, tailored to the users' needs and budget.

Best regards,
SpagoWorld Communications

News

SpagoBI continues to cooperate with universities
An example of the continuous cooperation between SpagoBI and universities is demonstrated by the seminar on SpagoBI held by Andrea Gioia at the "Politecnico di Milano" in Cremona (Italy) on 10th June 2011, within the degree course on Informative Systems. More information
Moreover, a student of the University of Milan (Italy), suffering from dystrophy, has graduated in Computer Science with honors, with a thesis on the free/open source platform Spago4Q. The thesis is available for download in the University section of SpagoWorld website.

SpagoBI 3.0 news across the world
Have a look at the TheySay area of the SpagoWorld website, to find out some interesting news and posts coming from different countries, talking about the SpagoBI 3.0 release and its new features!
Moreover, an article entitled "*4 money-saving, open source business intelligence suites*" (issued by "IT World" on 25th May 2011) mentions SpagoBI, the only entirely Open Source Business Intelligence suite, as one of most successful tools supporting the collection and organization of a great amount of data, with all benefits in terms of costs, thanks to the adoption of open source licenses.
